PROFESSIONAL SUMMARY

Computer Engineering student (2023-2027) and full-stack developer focused on React.js, Node.js, Express.js, TypeScript, MongoDB, PostgreSQL, REST APIs, and Socket.io. Hands-on experience with CRUD workflows, authentication, API integration, media handling, and real-time applications.

EDUCATION

B.E in Computer Engineering 2023-2027

GIDC Degree Engineering College, GTU | CGPA: 8.4/10

EXPERIENCE

Full Stack Development Intern - UpSkill Campus 2025

Full-Stack Development Training Program

- Developed responsive web interfaces using HTML, CSS, JavaScript, and React.js through project-based full-stack development.
- Built and consumed RESTful APIs and worked with Node.js and Express.js for server-side application development.
- Worked on authentication, CRUD operations, database integration, and frontend-backend communication.
- Used Git/GitHub for version control and followed collaborative development practices.

PROJECTS

PlayHub – Multiplayer Gaming Platform React, TypeScript, Tailwind CSS, Node.js, Express.js, Socket.IO, PostgreSQL, Redux Toolkit

Live demo: PlayHub Live Demo | **Repository:** GitHub

- Built a real-time multiplayer gaming platform with authenticated matchmaking, private room creation, player challenges, rematches, and synchronized Tic-Tac-Toe gameplay using Socket.IO.
- Implemented JWT authentication with HttpOnly cookies, protected routes, PostgreSQL persistence, game history, player profiles, statistics, and a global leaderboard.
- Developed real-time online presence and challenge workflows with multi-tab connection handling, server-side game validation, disconnect handling, and secure API/socket input validation.
- Deployed the full-stack application using Render and Neon PostgreSQL with environment-based configuration, production CORS, secure cookies, health checks, and responsive gaming UI.

ConnectHub - Full Stack Social Networking Platform MERN, Socket.io

Links: GitHub | Live Demo

- Developed a full-stack social networking platform using React.js, Node.js, Express.js, and MongoDB with posts, comments, likes, profiles, connections, and search.
- Built REST APIs for user, post, comment, and connection workflows and integrated frontend components with backend services.
- Implemented JWT-based authentication and bcrypt password hashing for secure user authentication.
- Added real-time likes, comments, notifications, and client-server communication using Socket.io; integrated Cloudinary and Multer for media uploads.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C

Frontend: React.js, Redux Toolkit, React Router, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, Socket.io, REST APIs

Databases: MongoDB, PostgreSQL

Development: CRUD Operations, API Integration, Authentication, Real-Time Communication

Tools: Git, GitHub, Postman, VS Code

Core: Data Structures & Algorithms, OOP, DBMS, Computer Networks

OPEN SOURCE CONTRIBUTIONS

GirlScript Summer of Code 2026 (GSSoC'26) - Contributor 2026

- Selected for GSSoC'26 and contributed to open-source projects through GitHub-based development workflows.
- Merged 8 pull requests across 3 repositories and completed 8 contributions.
- Implemented fixes and feature improvements including reservation validation, menu preview, admin stock-out handling, dark-mode readability, and drag-and-drop resume upload.

Profile: GSSoC Profile

HACKATHON

Odoo x LDCE Ahmedabad Hackathon 2026 - Finalist & Team Leader Aug 2026

- Selected for the final round of the Odoo x LDCE Ahmedabad Hackathon 2026 and participated as Team Leader.

Project: GlobeTrotter - GitHub

CERTIFICATIONS

- Emerging Technologies (AI, ML, Deep Learning, SAP BTP) - SAP | Python, AI & Data Analysis - Edunet Foundation
